WORK EXPERIENCE

Npontu Technologies - Tse Addo, Accra — **May-Jul 2026**
Platforms Developer Officer Intern

- Built a mobile-first escrow payment platform for the West African market, covering an 11-state transaction lifecycle, mobile money integration, a trust-scoring system, and an escrow fee model.
- Built core components of a multi-tenant academic management platform, generating implementation prompts for phased feature builds and resolving a batch of portal permission and workflow bugs.
- Produced full requirements documentation and phased implementation architecture for an internal HR ERP module, covering schema-per-tenant multi-tenancy, an admin panel, and role-based access control.

SnooCODE – Mallam, Accra — **Jul - Aug 2025**
Software Development Intern

- Designed and implemented the core components of a Retrieval-Augmented Generation system by vibe coding to streamline grant proposal development, improving response relevance and content quality.
- Built and integrated functionality to query and extract insights from previous grant proposals, enabling the auto-population of new proposals from uploaded templates and significantly reducing drafting time.

IOT Network Hub – North Ridge, Accra — **Jul – Aug 2024**
STEM Program Intern

- Learned and applied basic C++ programming to build and configure Arduino-based components for an IoT network hub, gaining hands-on experience with embedded systems and hardware-software integration.
- Proofread and edited STEM training manuals to ensure grammatical accuracy and clarity, improving the overall quality and usability of the materials.
- Supported marketing initiatives by engaging in face-to-face outreach to promote the upcoming STEM program, contributing to increased student participation.
- Assisted in the coordination and supervision of training sessions, ensuring smooth program operations and a positive learning environment for all participants.
- Developed strong skills in attention to detail, fact-checking, and public speaking through hands-on involvement in program preparation and delivery.

Project Paw – Pennsylvania, USA — **Jun 2023**
Consultant

- Collaborated in a team of 6 to support The Center for Animal Health and Welfare, developing innovative strategies to increase public engagement and online traffic.

- Conducted research and data analysis to identify outreach opportunities and presented actionable recommendations to enhance the organisation's visibility.
- Contributed to improving operational efficiency and strengthening community involvement in support of animal welfare initiatives.

Ariella Kingh Ltd – UK **Jun 2022**
Packaging Assistant
- Completed the filling and packaging of cosmetic products as part of a team of 3, efficiently completing up to 500 units within the day.
- Supported dispatch preparation for hospitality clients, ensuring accurate labelling and timely organisation of deliveries.

PROJECT AND RESEARCH

HOPSA E-Commerce Marketplace Platform **Jul - Aug 2026**
- Designed a Ghana-focused marketplace connecting school alumni and students to buy and sell products and services, with a community hub to foster support through mentorship, networking and charities.

Phashion Sense – Fashion E-Commerce MVP **May 2026**
- Collaboratively designed and shipped a fully functional mobile-first fashion e-commerce app in under 3 hours as part of the Coded Esports x Miro Hackathon in a team of 3.
- Built a 3-step onboarding flow that captured a user's body type and measurements to automatically recommend clothing sizes throughout the app.
- Implemented a cart and wishlist system persisted to localStorage with no backend or database required
- Integrated WhatsApp as the checkout channel, constructing pre-filled order messages sent directly to the vendor.
- Mapped the full user journey and system architecture visually in Miro to coordinate parallel development across the team.
-

AfroVoice – Voice-controlled automated CFO platform MVP **Apr 2026**
- Co-founded and contributed to the development of an AI-powered finance assistant designed to help businesses manage financial operations through voice interaction.
- Worked within a startup team structure to prepare for pilot deployment and onboarding of initial users.
- Focused on improving accessibility and efficiency in financial management workflows.

Apartment Booking Website **Mar 2026**
- Built a website to enable users to view and book stays
- Designed page structure and user flow for bookings
- Managed content and layout using a website builder

Ashesi University
Foundations of Design and Entrepreneurship **Sep – Nov 2025**

- Conducted ethnographic research on poor sleeping schedules among underperforming tertiary students

CO-CURRICULAR ACTIVITIES

International Community School **May – Aug 2025**
Social Media – Sound and Video Editor
- Served as Sound and Video Editor on the media and editorial team for the graduating year group, contributing to the creative direction and production of digital content.
- Designed, implemented, and oversaw the development of the digital yearbook and its official Instagram page, ensuring cohesive branding and high-quality presentation across platforms.

International Community School **Sep 2024 – Jun 2025**
Football Team - Player
- Played as a midfielder for the school team

International Community School **Sep – Dec 2023**
Community Service – Reading guide
- Assisted local primary school children in developing their reading skills through guided reading sessions.

SKILLS

- **Programming** – JavaScript, SQL, PHP(Laravel), Python
- **Frameworks & Data** - Laravel, PostgreSQL,
- **Tools** – Git & GitHub(version control), VS Code, AI-assisted development tooling basic command-line usage
- **French (Intermediate)** – Working proficiency in reading and written communication
- **Digital Design** – Image editing using Adobe Photoshop
